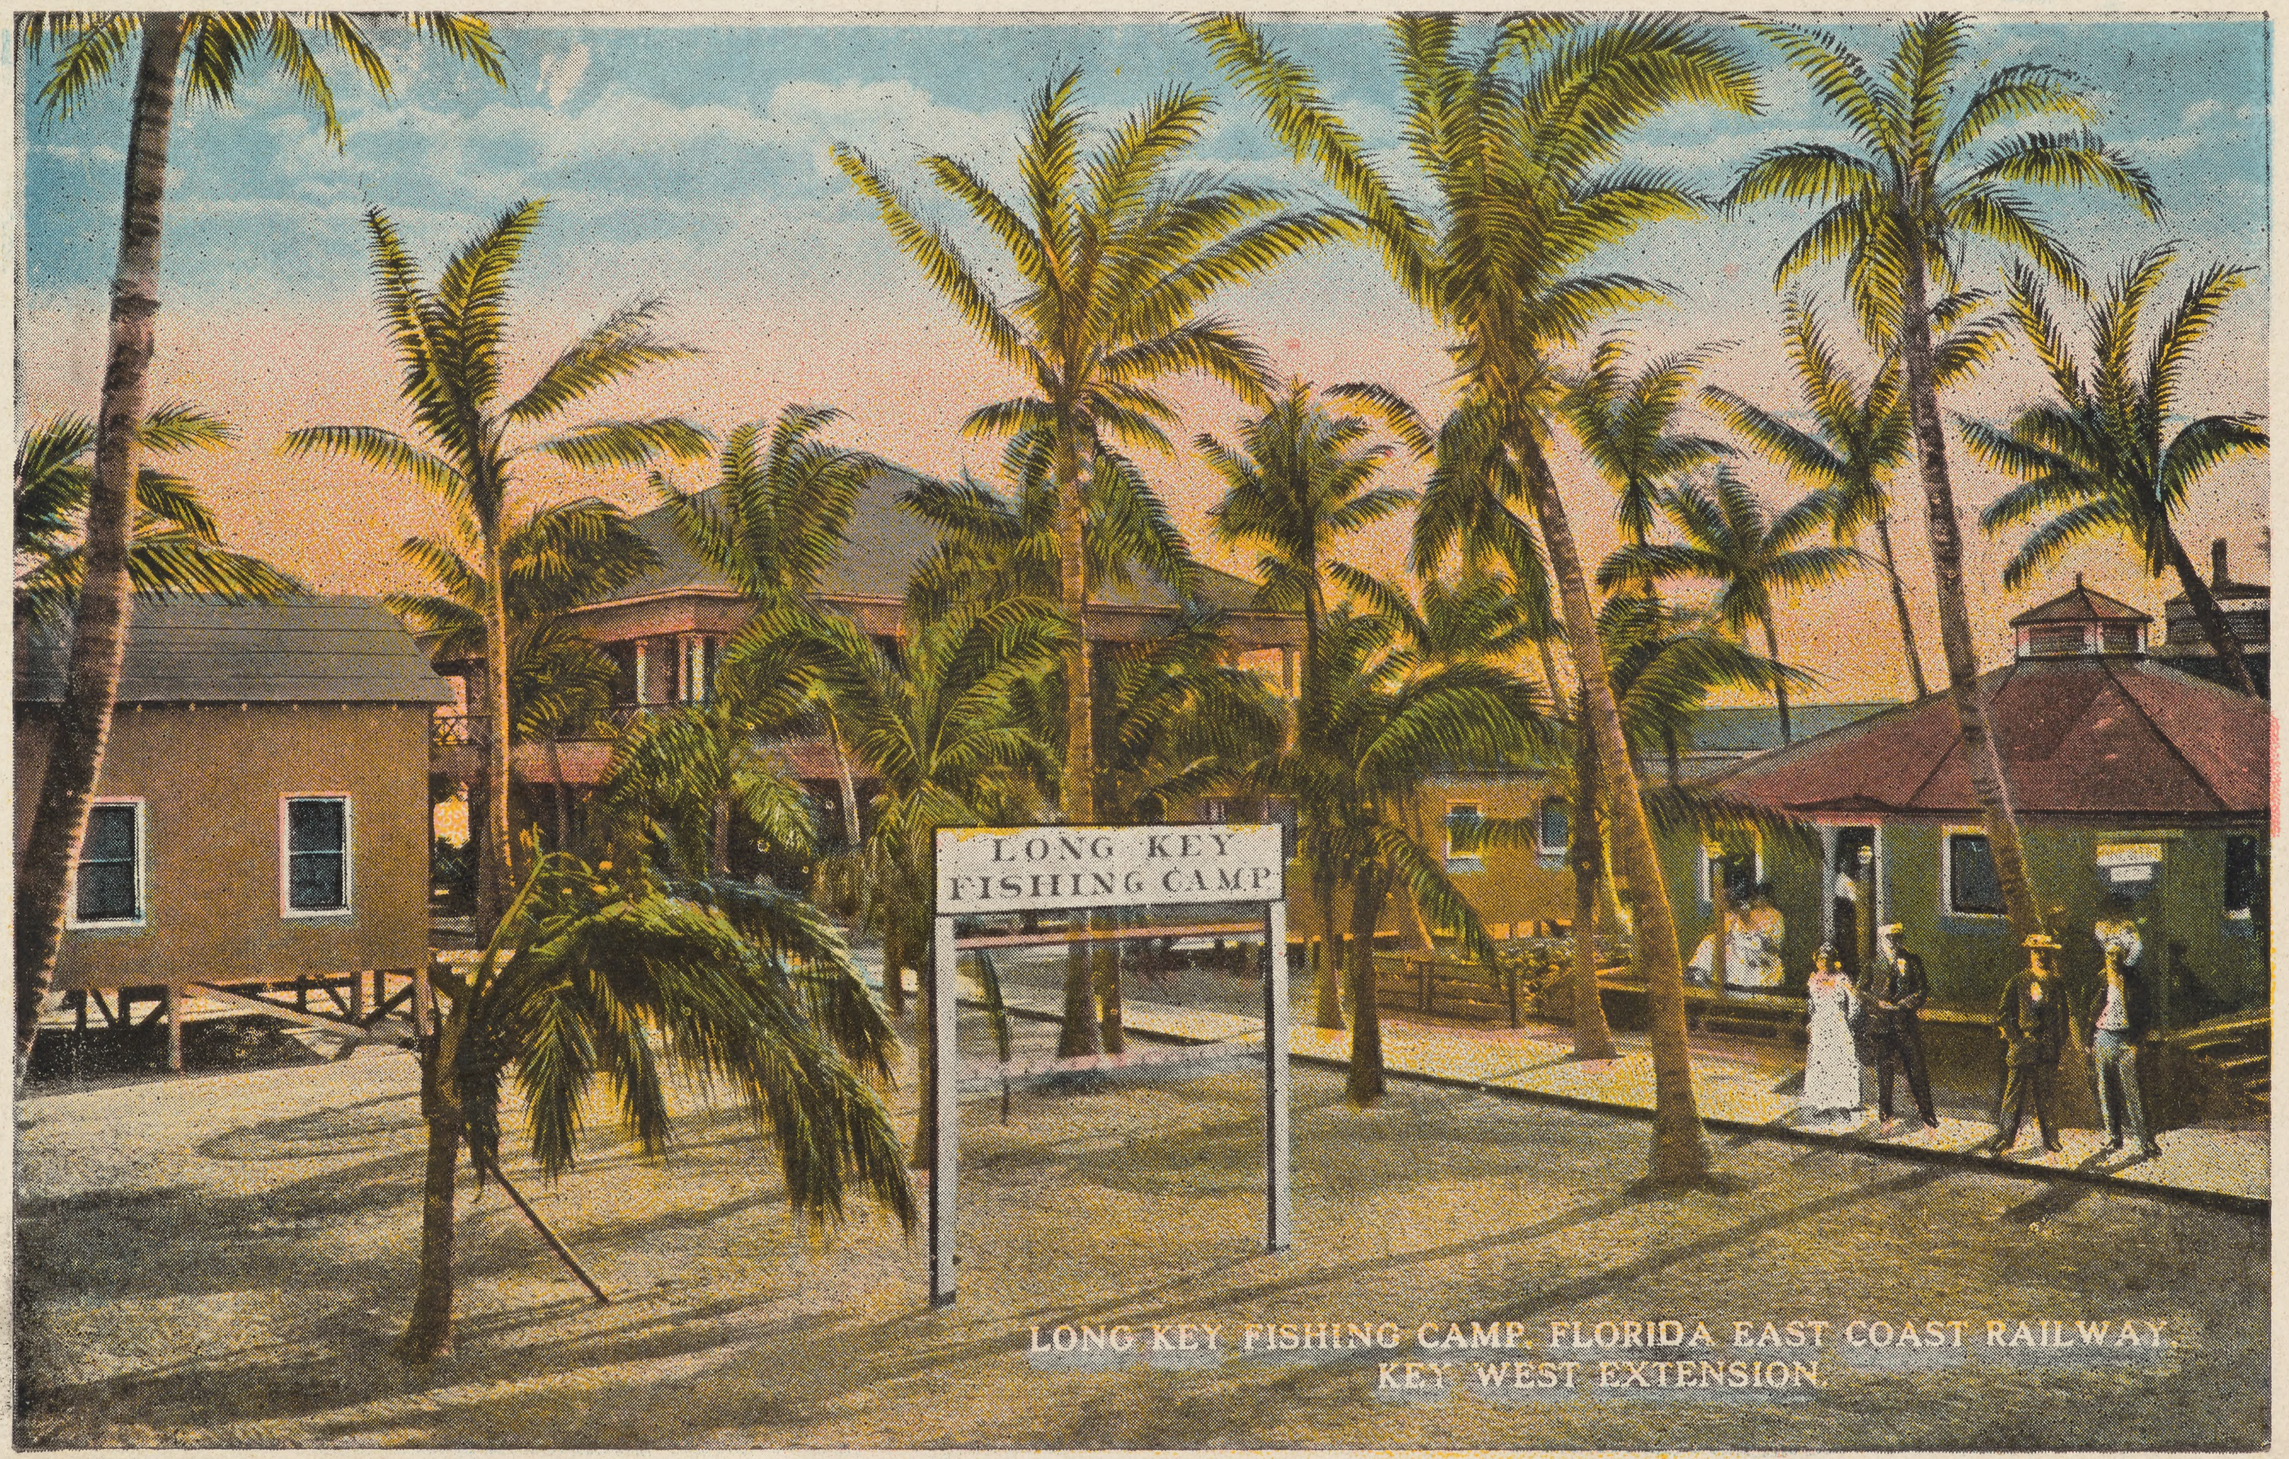
Florida Trip

1919.

Mr. H. M. Flagler's arrival with First Train
to enter Key West, Fla.

Copyright 1912 by Harris.



LONG KEY FISHING CAMP, FLORIDA EAST COAST RAILWAY.
KEY WEST EXTENSION.

Monday
Febr. 17, 1919

Mr. H. S Barber and myself left Washington at 2 30 p m for Florida via Atlantic Coast Line

Tuesday
Febr. 1919

Traveling along

Wednesday
Feb. 19, 1919

Arrived at Homestead about 6 15 a. m; took breakfast and after a short time Mr. Mozier and Snyder arrived per auto from Paradise Key. Our baggage having not yet arrived we started with M. and S. and arrived at Paradise Key about 11 o'cl. a m. Made a preliminary excursion in the woods close to the Club house and were disappointed regarding abundance of insects but B. found one specimen of that new Rhodobaenus. It occurred on a Palmetto tree on the trunk of which were some branches of a grass-like tree fern. In P.M. went along the road westward as far as the Everglades. In the evening B. lighted his acetyline lamp and a vast number of insects came to the light, not many species of Coleoptera (a Philhydrus in enormous number of specimens) and a Bastis)

Thursday
Feb. 20, 1919

A.M. Excursion into the burned area north of Clubhouse. Collecting on palmetto trees and feeble attempt to use the butterfly net for beating (Tephroceras). In P.M. short excursion to the Royal palms near the eastern end of the road. Very poor success at the acetyline lamp. M. & B. went to Homestead and brought the baggage

Friday
Feb. 21, 1919

Short excursion near the house. Took species of Cis (a cubicle fungus (fungus preserved) Cometr. serpentinus is nearly [illegible] to Persea

Monday Feb 24 M, B and all others went to Timms Key and returned at 1 PM. I went into the wood along the west road as far as the prairie Did not find much. In PM. B and myself on the glades west of the house. At night experiment with lighted tent.

Tuesday Feb 25 The boys started for the dredge after breakfast. Went alone into the shrubbery near the house. An Anthonomus on Myrica, Monachus on Myrica Conotrachelus among cut down Tillandsia. Toxotropis and Otiorrhynchus on Chamaerops. Male bugs (3) on three palmetto leaves. In the afternoon drive with Mr. M. toward Homestead into the pine woods, No Coleoptera found

Wednesday Feb 26, — Drive with Mr. M. to Homestead, to investigate Zamia. Found Staphylinus on male flowers and between seeds (also a Synuchus and a Stelidota) with its probable larvae

Thursday Feb 27 W. & Barber to Homestead, came back at 1 PM. Myself in a.m. near house and at pitcher grove. In P.M. W. B and myself to Taylor river. Snyder left

Friday, Febr 28. Wet more left in A.M. Barber & myself examined the material from Lime Stone Sink at Timms Key (Febr 24) out of the Sarcophagus from Homestead. (Allorchirus, Hapalips Lepid Larva (one imago) and Scarabs. In P.M. sweeping the western prairie and beating the bushes at picknick ground

Saturday, March 1'19 Barber and Mosier to Homestead, to collect fauna material. Myself to eastern part of the hammock (sifting). In afternoon B. & myself to picknick ground. Good beating of the prairie grass. At line Canteen collecting on roof of veranda

Sunday, March 2'19 Forenoon spent in taking care of specimens Early in p.m. B. and self excursion to eastern part of hammock Very few insects seen but B. beat a strange Histerid from a slender stick. At night excellent collection at light on verenda roof.

Monday, March 3, '19. B. & myself in early morning to a pine wood about 1 mile forward Homestead: rich fauna on a cut pine log and its branches. In P.M. worked in our room (Ladies convention), toward evening short trip to the everglades near picknick ground

Tuesday, March 4, 19 Excursion to eastern part of hammock Ficus aurea. Rain in p.m. Short trip to picknick ground

Jungle and Palm in Womans State Park, near Homestead, Fla.
